## Summary

## **a. 簡介 (Introduction)**

Located in Asia, Taiwan is an important transportation hub which makes it convenient to conduct its business with surrounding countries with remarkable performance. Besides, due to cultural and language similarity Taiwan is actively expanding its business to Mainland China with extraordinary results which makes Taiwan as a springboard for other countries to learn experiences prior to entering into the Mainland Chinese market. The IMBA program at the National Taichung University of Education (NTCU) is aimed to educate professionals with advanced international business management talents, i.e., global perspectives, advanced profession, outstanding leadership, and international communication skills.

Since established at 1899, National Taichung University of Education (NTCU) has witnessed the social and economic development of Taiwan over decades. The core values of NTCU are “refinement, creativity, and new prospect” which act as guiding principles to lead our faculty members to educate our graduates to be a “whole person” . Currently, there are four colleges in the university: College of Education, College of Humanities, College of Sciences, and College of Management. Hopefully, the international undergraduate students with outstanding performance will pursue their advanced study with NTCU.

All of the faculty members in the College of Management received their PhD degrees from well-known universities world-wide, and possess extensive experience in executive teaching and consulting. Our faculty members are specialized in various fields in order to provide interactive, top-quality and diverse learning experiences to students. It is specifically noted that our IMBA program incorporates tourism and recreation management, cultural creativity operation and management, and higher education management in addition to international business administration.

The core courses of IMBA focus on the economic and business development in the Asia-Pacific region, through the comprehensive curriculum design, as well as field trips to visit well-known enterprises domestically and internationally, students will broaden their international scope and reinforce their strategic thinking.

We expect our graduate students to possess the profession and knowledge of finance, economy, business management, cultural creativity, tourism and recreation management. Therefore to expand their career goal from Taiwan to south-east Asia, north-east Asia, or Mainland China, and to posit themselves as top management leaders with specialty in Asian-Pacific market.
